FIT IN 4 WORKOUT

Helen is here to take you through 4 simple exercises which will help you improve your running, as well as toning your legs, tums and bums!

Aim to spend 30 seconds on each exercise, with a 5–10 second recovery in between. Repeat this 3 times before moving on to the next exercise. When you're ready, you can increase this to 45 seconds, and then 60 to really push yourself.

01 PLANK

Lift your body up with your weight on your elbows and toes. Keep a straight line from your neck down through your legs and to your ankles. Engage all your core muscles by pulling your belly button up to the ceiling. Keep your chest over your elbows.

Hold for 30–60 seconds.

02 LUNGE

Step forward and lunge down, making sure your body stays upright and your feet are facing forwards and in line with each other.

This strengthens the glutes and hamstrings, key muscles for strong, injury free running.

03 PRESS UP

Start on all fours. Place your hands a shoulder and a half's width apart and slightly raise and cross your ankles.

Lower your chest to the floor and push back up, not just pushing through your chest and arms, but also through your tummy.

Take it to the next level: When you're ready, try a full press up by straightening your legs so you have a straight line from your neck down through your legs and to your ankles.

04 BICYCLE

Start by lying on your back. Alternately cycle each knee up towards your opposite elbow keeping a steady rhythm and control. Keep your tummy muscles pulled in tight.
